Solutions For a New Economy

Paper-based procurement processes are not only slow and expensive, but create barriers to enforcing purchasing policy. Unfortunately, the cost of a professional grade spend management solution is beyond the reach of many corporate budgets, **until now.**

World Procurement® delivers professional grade enterprise spend management in a cloud based Software as a Service (SaaS) solution **without cost or obligation.**

COMPELLING ADVANTAGES

There are many quantifiable benefits of using SpendManagerPro™ that result in immediate and lifecycle Return On Investment:

- **No acquisition cost:** Sign up online for Department or Enterprise.
- **Reduced implementation time:** Up & Running in as little as 24hrs. with little or no I.T. involvement.
- **No annual maintenance fees:** No charge for software updates!
- **No hardware to purchase:** Mission critical cloud based platform certified SAS70 Type II, HIPAA, PCI
- **Seamless Integration:** APIs allow integration with ERP or other business productivity systems.
- **Dynamic Budget Management:** Helps guard against overspend and maximizes use of Grants funding.
- **Reduced overall training costs:** Acts as front-end for ERP & Financial Accounting Systems.
- **Increased user satisfaction:** Easy to use, wizard driven, Amazon.com like interfaces.
- **Client saves \$34MM/yr. in Case Study**

Still Paying for a Spend Management Solution?

Sign-up Online - it's **FAST** and **EASY**

NO annual fees or Trial Period

UNLIMITED number of users

Integrated **RFQ** features

Exploring more cost effective opportunities.

World Procurement® announces the latest generation of spend management that can prioritize and automate tasks while immediately driving down operating costs regardless of the budgetary or resource constraints of For-Profit and Non-Profit organizations.

Already have a Spend Management Solution? Consider a superior alternative that **will eliminate** the annual maintenance fees and provide access for an unlimited number of users, worldwide!

Do not have an Existing Spend Management Solution? Turn spend into a source of savings and innovation, and discover the benefits that only SpendManagerPro™ can offer with **no capital investment** or IT support.

Powerful Marketplace Drives Compliance

An Amazon-like shopping and shipment tracking experience with millions of items from customizable catalogs, including publically awarded contract catalogs, coupled with unparalleled manual requisitioning capability and proprietary compliance management drives down cost and helps ensure more work gets done faster, in less time, with better accuracy than ever before.

Our exclusive, **patent pending, grants management technology** not only helps ensure the money is well spent, but automates compliance and accountability.

Turbocharge the Efficiency of any ERP/ Financial Accounting system

Employee turnover, overwhelmingly complex and user unfriendly interfaces of many ERP/ Financial Accounting Systems lead to confusion, data errors, considerable training requirements and cost.

Our cloud-based solutions all but eliminate these challenges by providing an extremely user friendly, procurement-to-payment front end to unleash the true power of your existing ERP/Financial Accounting System.

The Solution for YOUR Organization

Whether it's the uncertainty of a changing economy or one of the many other diverse challenges that occur unexpectedly, **'no other company knows your business like we do'**.

Our solutions are designed to help overcome the challenges associated with too many directives, conflicting priorities, and not enough capabilities to quickly manage tasks.

With on-the-fly configuration and automated task management, SpendManagerPro™ can **minimize both time and resource requirements** while helping ensure compliance.
